INTELLIGENT POWER

We've combined all of the features integrators need into one unique power distribution unit to deliver surge protection, remote control, smart home integration, rack temperature management, and more. The 12 individually controllable outlets have power metering, self-healing and automatic reboot capabilities for smarter remote management of your connected devices. An additional always on service outlet is available when you need to charge a laptop or cell phone when working on the system. The system can also be programmed and setup without an internet connection.

Specifications:

OPERATING TEMPERATURE: 14° F - 104° F (-10° C - 40° C)

SURGE PROTECTION: 5100 Joule (replaceable)

EXTERNAL ANTENNA: Yes

OUTLETS (TOTAL): 13 outlets

ALWAYS-ON OUTLET: 1 (front) service outlet

SWITCHED OUTLETS: 12 (rear)

AC INPUT OUTLET: IEC C14, 15A circuit, product UL rating 12A

CIRCUIT BREAKER (COP): Yes (rear)

CORD LENGTH: 6ft

SAFETY CERTIFICATIONS:

UL/CUL, FCC. UL 62368-1+UL 498+1449 with CSA 269.3+UL 1283, FCC Part15B+ICES-003, FCC ID/ISED (wireless de vice FCC)

WARRANTY: 5 Year Limited

REMOVABLE SURGE PROTECTION MODULES

The effectiveness of a surge protector weakens with every single surge. Instead of leaving your devices vulnerable or replacing the entire system any time it takes a hit, two removable surge protection modules (MOVs) allow you to replace just the modules. The app lets you see their remaining life (Surge Mileage) so you can monitor the condition of the MOVs and schedule servicing to replace as needed.

Self-Healing Relays for Automatic Rebooting

The smart outlets have contact closure and sensing relay capabilities, which means they can automatically reset outlets that are not on the network. Automate an outlet reset process so you can experience your smart home technology without inconvenient interruptions requiring service calls or visits.

Smart Temperature Monitoring

Four temperature sensors allow you to set up features like turning on a fan or turning off devices when the temperature gets too high.

Prevent Technical Issues Before they Happen

Reduce service calls and truck rolls by programming connected devices to automatically reset on an ongoing schedule.

Integrate with the Best

Big Dog Power products are “automation-ready” for Control4 and Crestron, with more platforms coming soon so you can continue managing your devices through the same control system app.

Manage Everything from One App

An intuitive app design provides a simple user experience for homeowners to manage connected devices. Integrators can monitor all of their clients within the MAVbase app with the option of either remote or direct access. Direct access allows integrators to login and program the PDU without internet.
